December 24, 1967

Dear Mr. Weisberg,

After debating the issue with myself for quite some time, I now write you to tell you that I have some information which you may find useful in your investigation of the CIA's involvement in the Kennedy assassination, and CIA activities in general. It concerns a group of people in Washington who use the name Public Affairs Staff. If you already have information on them, then you can just discard this letter in some safe way. But if you don't, I suggest that it would be worthwhile for you to get in touch with me.

I realize that you must get many letters of this nature that turn out to be false, or from crackpots, and so I suggest that you check the TV station in Dallas that broadcast the exclusive interview with District Attorney Garrison about two weeks ago in which he revealed the theory about the man in the manhole. You will find that the next day they got a call from a company named Radio TV Reports in Chicago who wanted to get a copy of that broadcast for a client of theirs who was "a private interest group." The station took the request and later called Radio TV Reports and told them they'd be glad to supply the program to the client if the client contacted them directly. The matter was then dropped. It was I who called the station, and I'm now prepared to name to you who the client was, and many interesting facts and figures about that client.

I'm reluctant to send anything through the mail, and since I'm involved in some "anti-Establishment" endeavors here in Chicago I have reason to believe that my phones, both at home and in my office are tapped by the F.B.I., and so am also reluctant to discuss these matters on the phone. If you're interested, I suggest you contact me by phone, at which time we could arrange some way to meet, or some way for me to meet with someone you trust in the Chicago area who could then deliver this information to you. You can reach me at either 527-4290 (office) or 248-1386 (home). I suggest you do it soon.

It's a frightening time when people interested in the truth have to be so careful about contacting each other, and if the information I have is of any use to you, I ask nothing more from you than your promise that you won't let up one iota in your effort to return us to 1968 from 1984.

Sincerely,

Russ Trunzo
